Mr. Brad Raffensperger
Secretary of State
214 State Capitol
Atlanta, Georgia 30334

Re: Notice and Demand for Immediate Corrective Action

Dear Sirs and Madams:

It is with great regret that I am forced to write to you today, for at this juncture we both have failed. The existence of this body, the Georgia State Election Board, is for the sole purpose of ensuring “Fair, legal and orderly elections”. Our job is to formally inform you of incidents and problems which require your attention. You are charged with promulgating rules and regulations, investigating the administration of elections and acts of fraud. It is only possible through this symbiotic relationship that together we yield “Election Integrity”.

We have invested immeasurable amounts of time and resources to investigate, meticulously document and file official, evidence-based complaints which detail very serious failures of Georgia’s election system. You have repeatedly failed to acknowledge, investigate or address the substance of our complaints. Because you have failed, we have failed.

What’s more, the Chairman has gone to great lengths to suppress and stymie those who dare question the sanctity of Georgia’s elections. He has done so with community leaders, with members of this board and has done so with me. Like many, we had high hopes for Chairman Duffey. As a former Federal Judge we expected him to apply the same principles and equitable oversight of the State Election Board that one would expect from such an esteemed arbiter of justice and scholar of the law. Which is why we supported Mr. Duffey and in good faith gave him the latitude, respect and time necessary to effectuate change. We have been understanding of the many challenges before him, including budget restraints, backlogs, record-keeping problems and a learning curve, but those have all long been exhausted. We have been ignored and our complaints and concerns dismissed.

To make matters worse, we learn of a consent agreement as it was ratified by a vote of this board. The agreement was to purportedly address a complaint regarding factual errors of the 2020 hand count by Mr. Joe Rossi. The evidence and facts of that complaint were verified by Governor Kemp and referred to this board for investigation and now some eighteen months later, resulted in a consent agreement. We have learned that the terms of this agreement were negotiated in secret by the Attorney General's office and Fulton County, then ratified by this board by a vote without some board members ever seeing the document. What's more, the details of the document are redacted and mask the facts from the public that the 2020 General Election hand count-audit was a failure- or a fraud.

What's more, not only did this surreptitious process hide from the public that the hand count erroneously attributed approximately four thousand (4,000) more votes to Joe Biden but took absolutely no action to correct the public record as required by Georgia law. In fact, the consent agreement did nothing more than order Fulton County to follow the law. Some may consider such a requirement "superfluous", while others like me, characterize it differently, considering the circumstances, and simply call it what it is. Bullshit.

I apologize if such language has offended anyone, but I too am offended. I am offended and ashamed that this board would insult the countless hours of hard work, dedication to civic duty, and sacrifice made by my friend Joseph Rossi who has relentlessly forced this issue before this board because it was the right thing to do, and you dismiss it as though it were trash. With the exception of Dr. Johnston who had the good sense and courage to vote against adopting an agreement she had never seen, shame on all of you.

I highly suggest that you make the details of the consent agreement public, invite public discussion and comment, and/or refuse to vote on the adoption of the agreement for it defies the primary objective of this board- to ensure fair, legal and orderly elections. Anything less and we will pursue all legal remedies to hold this board accountable. We have had enough!

I want to offer you fair words or warning as there is another matter currently under investigation for which I am Mr. Rossi's co-complainant. The case number is 2023-025 and we will not accept such a resolution as the one before you today. The complaint documents an approximate 20,000 ballot deficiency from the first count of the November 03, 2020 General Election with Fulton County's own records as evidence. The same complaint details a similar deficiency in the second count, or recount, which includes 3,125 duplicate ballots (counted twice) and the results for over 17,000 ballots which have no corresponding ballot images (an impossible combination). The data, facts and details of this complaint have been verified by the Governor's office and multiple experts. With the state of current events, it would be beneficial to the fair administration of justice that the board accept its responsibility and perform a serious investigation.

Mr. Duffey, should you take this opportunity to right the ship, then I will extend the olive branch and our full support in pursuit of fair, legal and orderly elections. There is no other option as we will not accept anything less. WE will not fail.

Govern yourselves accordingly
